Horizon-scanner source architecture for Caritas-Zentrum Miesbach

Verification frame and main findings

Research cut: 8 October 2026. The project brief says 6 October 2026; I used the current system date, 8 October 2026, so the register includes material published through that date where it was visible.

The territorial premise is correct: **Landkreis Miesbach has 17 municipalities**. The county's own directory confirms the set in the brief. [1] The March 2026 local elections materially changed the political layer that the scanner must watch. The county notes that Gmund a. Tegernsee and Kreuth did not elect mayors in March 2026 because their mayoral cycles are off-cycle. [2] Jens Zangenfeind was elected Landrat in the 22 March runoff with 78.0 percent and is now shown by the Landkreis as Landrat. [3] In Miesbach, Dr. Thomas Acher won the mayoral runoff with 51.9 percent. [4]

The primary-source check also verifies several other post-election office-holders without relying on pre-election pages: Bayrischzell's current council page names Georg Kittenrainer as First Mayor; Irschenberg's May 2026 municipal report identifies newly elected Florian Pichler; Tegernsee's council page from May 2026 identifies Johannes Hagn; and Waakirchen's new council page identifies Norbert Kerkel. [5] I did **not** obtain a comparably current primary-source confirmation for every one of the other municipalities, so I have not filled those names from memory or older pages.

The most important substantive finding for the scanner is that **the county already contains more coordination infrastructure than a superficial search suggests**. The Fachstelle für Soziales und Senioren publicly associates itself with Sozialplanung und Demografie, Sozialberichterstattung, the Sozialbeirat, Netzwerk Ehrenamt, Netzwerk Quartiersmanagement, Netzwerk Integration and the Verbund Psychische Gesundheit Region 17. It also lists a broad provider and civil-society environment. [6] The Pflegestützpunkt provides another cross-organisational node, including regular advice from Bezirk Oberbayern, while the GesundheitsregionPlus is currently described as **“im Aufbau”** rather than as an already mature network. [7] This distinction matters: the scanner should watch not just the creation of named networks, but whether they acquire mandates, recurring meetings, public work programmes and durable staffing.

There is also unusually strong fiscal reason to monitor several government levels together. Bezirk Oberbayern's 2026 budget is €3.199 billion, with a 24.7-percent Bezirksumlage rate; the Bezirk says roughly 92.8 percent of its 2026 budget goes to social services. [8] Bavaria's 2026 kommunaler Finanzausgleich is €12.83 billion, while the state explicitly acknowledges rapidly rising social expenditure at local and district levels. [9] These sources should be read together with the Landkreis and municipal budgets because a nominal increase in state transfers can coexist with a tightening of discretionary local social spending.

Two 2026 policy changes deserve immediate inclusion in any horizon scan. First, the federal SGB II regime changed on **1 July 2026**: Bürgergeld was renamed Grundsicherungsgeld and a large package of rules concerning activation, cooperation, housing costs and Jobcenter practice came into force. Further

provisions are scheduled for 1 August 2027. [10] Second, the Bavarian **PflegesoNah** programme remains active; the 2026 round runs through **31 October 2026**. [11] SeLA is also current and, unusually helpfully for this project, explicitly requires a sustainability financing plan for many supported measures and can fund senior-oriented Quartierskonzepte and volunteer-based Nachbarschaftshilfen. [12]

The Catholic structural layer is also more directly relevant than a generic "church" feed would suggest. The present Dekanat Miesbach encompasses eleven Pfarrverbände and is explicitly intended as a middle level for supra-parish networking and coordination. [13] The 2024 Dekanatsreform reduced the archdiocese from 40 to 18 deaneries and strengthened this middle level. [14] For the Protestant side, the correct scanner target is **Evang.-Luth. Dekanat Bad Tölz**, not Dekanat Rosenheim: its public material covers Miesbach-area congregations, and its current personnel page identifies the Miesbach pastor Erwin Sergel as deputy dean. [15]

I found **no sufficiently informative public project page for "Interkommunale Sozialraumlotsen" itself**. I therefore do not infer its present steering group, project-financing arrangement, municipal commitments, data-sharing arrangements or intended post-project Trägerschaft from public evidence.

The machine-readable deliverables are:

Download the full 61-row source register

Download the actor-network edge list

Download the monitoring calendar

In the register, **"no feed" means that no published feed URL was exposed in the page/search material I opened; no RSS address has been guessed**. The listing page is therefore the scraper target. "Verified" means the URL itself was retrieved and its current content or dated item was seen. "Archive worth keeping" is used where a source is older than twelve months as a news source but remains structurally important. "Not found" means exactly that, not that the institution or material does not exist.

Municipal verification coverage

Municipality	Best verified scanner endpoint in this pass	Newest/ current evidence seen	What it gives	Status
Bad Wiessee	municipal 2026 election / Rathaus press page	5 Mar 2026	leadership/election change	verified [16]
Bayrischzell	Gemeinderat	current from May 2026	mayor, council composition	verified [17]

Municipality	Best verified scanner endpoint in this pass	Newest/ current evidence seen	What it gives	Status
Fischbachau	final Gemeinderat election notice	18 Mar 2026	council composition	verified; archive endpoint [18]
Gmund a. Tegernsee	Kommunalwahlen 2026	2026	council election; no 2026 mayoral election	verified [19]
Hausham	Wahlen	2026	election material	verified [20]
Holzkirchen	Marktgemeinderat	current 2026–32	current council/ governance	verified [21]
Irschenberg	council minutes	22 Jun 2026	decisions, finance, local policy	verified [22]
Kreuth	Gemeinderat	current	council; mayoral cycle off-cycle	verified [23]
Miesbach	Stadtratswahl 2026	Mar 2026	council composition	verified [24]
Otterfing	adopted Haushalt 2026	Apr 2026	municipal finances	verified [25]
Rottach-Egern	no durable current listing endpoint pinned down	—	search located election material, but not a satisfactory ongoing scanner page	**not found for v1**
Schliersee	Haushalt 2026 listing	2026 budget cycle	municipal finances	verified [26]
Tegernsee	Stadtrat	from May 2026	current mayor/council	verified [27]
Valley	2026 council-election result	Mar 2026	council composition	verified archive endpoint [28]
Waakirchen	Gemeinderat sessions	meetings through 8 Dec 2026	agendas/calendar/ decisions	verified [29]
Warngau	Gemeinderat members	current 2026–32	current council	verified [30]

Municipality	Best verified scanner endpoint in this pass	Newest/ current evidence seen	What it gives	Status
Weyarn	no durable current listing endpoint pinned down	—	budget/election documents appeared in search, but not a satisfactory ongoing scanner page	**not found for v1**

This is an important design point: **do not treat a once-per-election result page as the municipality's long-term scanner source**. For Fischbachau, Valley, Bad Wiessee, Gmund, Hausham and Miesbach in particular, the v1 implementation should continue looking for the municipality's durable Sitzungskalender/ Ratsinformationssystem, finance listing and Gemeindeblatt listing rather than settling for the election page. Conversely, Waakirchen and Irschenberg already expose decision material in a form much closer to what a horizon scanner needs. [31]

Source register

The CSV contains **61 records with all requested columns**:

`name; URL; feed URL or "no feed"; operator; layer; source type; drivers and themes covered; change signals it reveals; update frequency; access method; date of newest item; reliability with reason; institutional interest; status`.

Its present coverage is 58 verified or deliberately retained archive sources, two “not found” municipal scanner endpoints, and one deliberately unverified Layer-8 bundle. The most important source families are below; the CSV is the canonical export.

Landkreis and local-service layer

Source	Layer	Signals	Newest/ current item seen	Why it belongs
Fachstelle für Soziales und Senioren	2	Structure, People, Demand/ supply	structural page; newest visible dated item 23 Dec 2024	Best public map of the county's existing social-planning and coordination architecture; retain despite sparse news cadence. [32]
Pflegestützpunkt	2	Structure, Demand/ supply	current	Cross-provider navigation node and direct interface with Bezirk Oberbayern. [33]

Source	Layer	Signals	Newest/ current item seen	Why it belongs
GesundheitsregionPlus	2	Structure, People	current, “im Aufbau”	Early signal of a new coordination structure before routines harden. [34]
Jobcenter – Leistung	2	Rules, Demand/ supply	docs visible 1 Oct 2026	Local implementation consequences of SGB II reform. [35]
Jugendhilfeausschuss	2	Money, Structure, Demand/ supply, Sentiment	notice 23 Sep; meeting 30 Sep 2026	One of the best statutory venues for seeing child/youth demand, Kita planning and spending collide. Its September agenda included a population forecast and Kita demand planning. [36]
Landkreis Amtsblatt	2	Rules, Money, Structure	2026 series	Legally consequential notices that ordinary press pages can miss. [37]
Krankenhaus Agatharied Presse	2	Money, Structure, People, Demand/ supply	21 Sep 2026	Hospital finance, staffing and service-change signals; institutionally self-presentational, so triangulate. [38]
Regionalentwicklung Oberland / LEADER	2	Money, Structure	18 Sep 2026	Captures awards and local projects that reveal where municipalities and civil society are building capacity. 2026 posts included projects in Warngau, Hausham and Miesbach. [39]
Landkreis Mobilitätskonzept	2	Money, Structure, Demand/ supply, Sentiment	18 Dec 2025	Essential for the mobility/ participation driver. [40]
MVV BergBus	2	Money, Structure, Demand/ supply	23 May 2026	Seasonal but useful signal of cross-jurisdiction transport provision; the 2026 season runs to 25 Oct. [41]

The **Fachstelle page is unusually important even though its dated news is stale**. It is an archive worth keeping because it explicitly identifies the county's coordination vocabulary—Sozialbeirat, Netzwerk Ehrenamt, Netzwerk Quartiersmanagement, Netzwerk Integration and Verbund Psychische Gesundheit Region 17—and enumerates many welfare and civic actors. [32] For horizon scanning, this is more valuable as a periodically diffed structural page than as a news feed.

Welfare and civil society

The public provider layer is active enough to produce useful weak signals. Diakonie Rosenheim's site had a 5 October 2026 item and exposes a Miesbach-specific Kinder- und Jugendhilfe page; that page says its ambulatory services are provided **on behalf of the Jugendamt**, making it useful both as a service source and as network evidence. [42] BRK Kreisverband Miesbach's news page was current to 18 September 2026. [43] Lebenshilfe Miesbach has both an active provider site and a particularly useful vacancy page, which is a direct skilled-labour signal rather than a retrospective report. [44] AWO's Miesbach senior centre was current to 25 September, the Hospizkreis calendar contains events through December, and Nachbarschaftshilfe Warngau shows active 2026 organisational updates. [45]

These should not be interpreted as neutral system reports. Their institutional interest is to explain and legitimate their own work. They are strongest for **closures/openings, vacancies, leadership changes, new projects and explicit funding announcements** and weaker for quantifying unmet demand, failed referrals or financial distress before management chooses to disclose it.

A notable gap remains here: I did not verify a current public scanner endpoint for every **VdK local organisation, Paritätischer member, Tafel, Mehrgenerationenhaus, volunteer agency, Bürgerstiftung, self-help group, Seniorenbeauftragte or Behindertenbeauftragte**. The county Fachstelle page partly compensates as a network directory, but it does not substitute for direct monitoring of those organisations. [32]

Church, Bezirk and Bavaria

The Catholic scanner should have three separate levels rather than one “church” source: **Dekanat Miesbach**, the archdiocesan structure/reform source, and the diocesan Caritas organisation. Dekanat Miesbach currently covers eleven Pfarrverbände and has an explicit coordination function. [13] The Caritas München-Freising Geschäftsberichte page currently carries the 2025/2026 report and is the most useful public source for group-level finance, workforce and organisational restructuring. [46] The Protestant counterpart for the Miesbach area is Dekanat Bad Tölz. [47]

At Bezirk level, four sources form a coherent package: Sitzungstermine for decisions; Bezirkshaushalt for money and Bezirksumlage; Sozialplanung for institutional redesign; and Sozialberichterstattung for indicator trends. [48] The Sozialberichterstattung source is particularly promising because the Bezirk now describes interactive dashboards filterable by region and year; this is much closer to the reusable evidence infrastructure a scanner needs than a one-off PDF report. [49]

At Land level, **SeLA remains live**, with funding for senior-oriented Quartierskonzepte, Nachbarschaftshilfen and other local measures. [12] **PflegesoNah also remains active** in 2026. [11] The Bayerischer Landtag's live sitting page exposes plenary and committee activity and already links its 2027 sitting plan. [50] The

Landesamt für Statistik should be retained for demographic baselines; its June 2026 municipal population publication still identifies 17 municipalities in Landkreis Miesbach. [51]

For ministries, the current Bavarian names in the verified sources are **Bayerisches Staatsministerium für Familie, Arbeit und Soziales (StMAS)** and **Bayerisches Staatsministerium für Gesundheit, Pflege und Prävention (StMGP)**. [52]

At federal level, the verified current names relevant here are **Bundesministerium für Arbeit und Soziales (BMAS)** and **Bundesministerium für Bildung, Familie, Senioren, Frauen und Jugend (BMBFSFJ)**. The latter is a changed portfolio from the older "family ministry" naming and should therefore be filtered under both the new acronym and legacy topic terms. [53] I did not independently reopen the current Bundesministerium für Gesundheit landing page before the research cutoff and therefore mark that element of the requested federal source set as still needing verification rather than silently treating the old source list as current.

Peer cases

The strongest directly transferable case located is **Gemeindeschwester plus in Rheinland-Pfalz**. It began as a model project, went through a "Verstetigungsphase," and is now a Landesprogramm. The current programme page says it is financed from state funds in the present 2025/26 funding period and describes both individual navigation and the role of the Fachkräfte in stimulating local supportive infrastructure. [54] This is unusually relevant to Miesbach because it makes institutional anchoring itself observable: model → transition/continuation → regular state programme.

Two additional peer-document sources belong in the register even though they should be treated as periodic research rather than weekly news: the Austrian **Community Nursing** continuation material, which explicitly addresses what happened after the 2022–24 pilot phase, and the ISA work on **kommunale Präventionsketten**, which examines resilience and institutionalisation across municipalities. [55] The Austrian example is useful precisely because continuation varies by Land and Träger rather than following one national template.

I did **not** verify adequate current primary documentation in this pass for all of the other requested analogues—Bavarian Dorfkümmerer, rural Bavarian Quartiersmanagement cases with documented post-grant outcomes, English social-prescribing link workers, and Dutch neighbourhood teams. They should stay on the research backlog rather than being represented by unsourced textbook descriptions.

Actor network and standing coordination

The edge list should be read as an **evidence graph, not a complete stakeholder map**. I included a relationship only where the retrieved source supported a relation such as funding, commissioning, institutional membership, coordination or supervision.

Evidence-backed edges

Actor A	Actor B	Relation	Evidence	Confidence
Fachstelle für Soziales und Senioren	Sozialbeirat	shared committee / coordination	county Fachstelle page [32]	high
Fachstelle für Soziales und Senioren	Netzwerk Ehrenamt	coordination	county Fachstelle page [32]	high
Fachstelle für Soziales und Senioren	Netzwerk Quartiersmanagement	coordination	county Fachstelle page [32]	high
Fachstelle für Soziales und Senioren	Netzwerk Integration	coordination	county Fachstelle page [32]	high
Fachstelle für Soziales und Senioren	Verbund Psychische Gesundheit Region 17	coordination	county Fachstelle page [32]	high
Pflegestützpunkt Landkreis Miesbach	Bezirk Oberbayern	cooperation / on-site consultation	Bezirk advice offered at the Pflegestützpunkt [33]	high
Jugendamt Landkreis Miesbach	Diakonie Kinder- und Jugendhilfe Miesbach	commissioned service / SGB VIII	provider states work is carried out on behalf of Jugendamt [56]	high
Lebenshilfe Miesbach, OBA LebensMUT	Bezirk Oberbayern	funding	OBA funding statement [57]	high
Lebenshilfe Miesbach, OBA LebensMUT	Freistaat Bayern	funding	OBA funding statement [57]	high
Erzbistum München und Freising	Dekanat Miesbach	supervision / middle-level church structure	archdiocesan structure page [13]	high
Dekanat Miesbach	its eleven Pfarrverbände	coordination	archdiocesan Dekanat page [13]	high

Actor A	Actor B	Relation	Evidence	Confidence
Evang.-Luth. Dekanat Bad Tölz	Miesbach-area Kirchengemeinden	church structure / cooperation	Dekanat and Holzkirchen regional pages [47]	high
Local project sponsors	Regionalentwicklung Oberland / LAG	LEADER funding/project selection	LAG project stream [39]	high
Landkreis Miesbach and public partners	MVV BergBus	funding / cooperation	2026 MVV service announcement [41]	medium-high

A critical missing edge is **Caritas-Zentrum Miesbach ↔ Sozialraumlotsen project ↔ Landkreis ↔ participating municipalities**. I found no public document robust enough to specify whether the relation is grant funding, formal Trägerschaft, delegated coordination, a cooperation agreement, merely project participation, or some mixture. That should be supplied internally rather than inferred.

Standing coordination forums

Forum	Publicly evidenced convener / institutional home	Attendance visible?	Public agenda/ minutes?	Scanner treatment
Sozialbeirat	Landkreis/ Fachstelle für Soziales und Senioren	not fully enumerated in material retrieved	no recurring public agenda stream located	**high priority; ask Landkreis/Caritas for membership, mandate and cadence**. [32]
Netzwerk Ehrenamt	Landkreis/ Fachstelle	not fully public	none located	monitor Fachstelle and ask for mailing-list/calendar metadata. [32]
Netzwerk Quartiersmanagement	Landkreis/ Fachstelle	not fully public	none located	directly relevant to Sozialraumlotsen; treat as likely overlap risk/ opportunity. [32]
Netzwerk Integration	Landkreis/ Fachstelle	not fully public	none located	monitor for changing support needs and cross-sector coordination. [32]

Forum	Publicly evidenced convener / institutional home	Attendance visible?	Public agenda/ minutes?	Scanner treatment
Verbund Psychische Gesundheit Region 17	Landkreis/ Fachstelle	not fully public in source retrieved	none located	monitor as mental-health coordination node. [32]
Jugendhilfeausschuss	Landkreis	statutory membership; committee source	**yes**, public meeting notices/ agendas exist	ingest every agenda and minutes/ decision document. [36]
GesundheitsregionPlus	Landkreis	still being built	not yet a mature recurring public record in source retrieved	monitor formation: steering group, manager recruitment, themes and membership are change signals in themselves. [34]
Gremium Gesundheits-, Sozial- und Versorgungsplanung (GSV)	Bezirk Oberbayern	regional/ Bezirk level	public institutional description; local Miesbach representation not established here	useful higher-level network signal, not a substitute for county coordination. [58]

I did **not** find sufficiently current public evidence to assert a standing Miesbach-wide **Pflegekonferenz**, a public **Bürgermeisterrunde with published minutes**, or a Miesbach-specific publicly documented **Psychosoziale Arbeitsgemeinschaft**. Bezirk Oberbayern states that Psychosoziale Arbeitsgemeinschaften are part of its planning architecture, but that does not establish the exact Miesbach forum, membership or meeting cadence. [58] These are interview questions, not facts to backfill.

The structural hypothesis to test is therefore slightly sharper than “coordination is missing”: **there are already many named coordination structures; the unknown is whether they connect to each other, whether they have decision rights, whether attendance is stable, and whether information moves between them.** That is consistent with the public institutional map but cannot be proved from it alone. [59]

Monitoring questions

The scanner should not merely collect news. It should run a stable set of questions against the incoming material so that “change” means something for the 2035/2040 design problem.

Monitoring question	Driver / decision	Sources bearing on it	Evidence **for** the concern or transition	Evidence **against** / stabilising evidence
Are municipalities losing discretionary capacity for social and preventive work?	municipal room for manoeuvre; financing	municipal budgets; Landkreis budget/ Amtsblatt; Bezirkshaushalt; Bavarian Finanzausgleich	Haushaltssperre, cuts in freiwillige Leistungen, higher Umlagen, deferred co-financing, project posts removed	social/ prevention lines protected or increased; multi-year commitments; unrestricted revenues absorb Umlagen
Are Kreisumlage and Bezirksumlage materially crowding out local coordination capacity?	financing; institutional anchoring	Bezirkshaushalt, county budget, 17 municipal budgets, StMFH	rising Hebesätze plus municipal statements that grants/posts must be cut	Umlage increases offset by transfers/ revenue without social-service retrenchment. The Bezirk's 2026 pressure makes this a live question. [60]
Is Sozialraumlotsen moving from a project into regular governance before grant expiry?	Verstetigungsmodell; Trägerschaft	Caritas internal material; Landkreis committees/budget; 17 councils; job pages	permanent budget title, Stellenplan position, formal mandate, Zweck-/ Kooperationsvereinbarung, regular committee reporting	repeated temporary extensions; no owner after grant; role disappears from budget/ organigram
Is coordination being formalised, or remaining dependent on personal relationships?	steering structure; governance	Fachstelle, Sozialbeirat, network pages, committee agendas, interviews	regular cadence, named chair, membership rules, minutes, work programme, succession arrangements	meetings only “bei Bedarf”; no minutes; participation collapses after staff turnover

Monitoring question	Driver / decision	Sources bearing on it	Evidence **for** the concern or transition	Evidence **against** / stabilising evidence
Do the 2026 political changes alter support for inter-municipal coordination?	political robustness to 2035/40	council agendas/ minutes, mayor/ Landrat pages, local media	motions to withdraw funding, change Träger or localise services; partisan conflict	cross-party budget votes; commitments embedded in agreements/ administration rather than personalities
Is skilled-worker scarcity becoming a service-capacity constraint rather than merely a recruitment problem?	skilled workers	Lebenshilfe/Caritas/ Diakonie/BRK/AWO job boards; hospital; council material	recurring vacancies, long reposting intervals, reduced hours, bed/place closures, agency dependence	vacancies filled rapidly; capacity/ opening hours maintained while caseload grows
Where is demand growing faster than supply?	demographic change; changing needs	Pflegestützpunkt, Jugendhilfeausschuss, Jobcenter, hospital, Bezirk dashboards, Statistik	waiting lists, Aufnahmestopp, rising cases, Kita shortfall, more Pflegeberatung, service closures	falling waits/ cases or documented capacity additions matched to population change
Are mobility barriers worsening access to services even when services technically exist?	mobility and participation	Mobilitätskonzept, MVV, municipal agendas, provider/user interviews	route reductions, weak evening/weekend access, missed appointments, Fahrdienst shortages	new routes/ tacts, demand-responsive service, measurable accessibility gains. [61]
Are youth/family needs shifting enough to require a different local service mix?	changing support needs	Jugendhilfeausschuss, Jobcenter, Kita planning, Diakonie youth services, BMBFSFJ	population forecast shifts, higher HzE demand, Kita gaps, school-avoidance/ mental-health pressures	demand planning stabilises and preventive services reduce escalation

Monitoring question	Driver / decision	Sources bearing on it	Evidence **for** the concern or transition	Evidence **against** / stabilising evidence
Will church restructuring release, remove or repurpose local social infrastructure?	organisational conditions; Caritas role	Dekanat Miesbach, Erzbistum, Caritas report, parish sources	property sales, parish mergers, fewer staff, closure of meeting space	buildings/ volunteer networks deliberately repurposed for social coordination or community use. [62]
Are welfare providers consolidating because the local provider economy no longer works?	market logic vs care logic; Trägerschaft	provider news/jobs, Caritas reports, councils, Bezirk/Bavaria funding	merger, insolvency, transfer of Trägerschaft, contract withdrawal, closure	new long-term service agreements, sustainable tariff/ refinancing settlements, capacity expansion
Which external grants create the next funding cliff—and which are genuinely bridgeable to regular finance?	financing; Verstetigung	SeLA, PflegesoNah, LEADER, future ESF+/ foundation sources	projects depend on 100% temporary money; no post-grant plan; repeated search for successor grants	grant requires and leads to explicit follow-on financing, regular budget or statutory contract. SeLA is especially useful because sustainability planning is built into parts of the programme. [12]

Monitoring question	Driver / decision	Sources bearing on it	Evidence **for** the concern or transition	Evidence **against** / stabilising evidence
Is the county moving toward shared data and social reporting, or accumulating more separate platforms?	coordination; data	Fachstelle, Bezirk dashboards, GesundheitsregionPlus, internal Caritas interviews	shared indicators, common taxonomy, data-sharing agreements, one reporting calendar	duplicate portals, stale directories, incompatible data, access restrictions, no named data owner
Is local legitimacy for preventive coordination strengthening or weakening?	governance; sentiment	council minutes, local media, Bürgerinitiativen, provider/civic sources	repeated controversy over cost, duplication, “bureaucracy,” municipal fairness	visible cross-party support, civic participation, concrete referrals/ outcomes cited by councillors
Which peer models survived project funding, and what made the difference?	institutional anchoring; Trägerschaft	Gemeindeschwester plus; Community Nursing; Präventionsketten; future peer sources	movement to regular state/local financing, permanent posts, integration into statutory/ municipal structure	closure, geographic contraction, temporary bridge funding without permanent owner

The peer-case question should be kept separate from “does the model work?” The more relevant question for Caritas is **what institutional mechanism survives the grant**. Rheinland-Pfalz's Gemeindeschwester plus is valuable because the public record explicitly distinguishes model, Verstetigungs- and current programme phases. [54]

German filter lexicon

A simple scanner should combine **entities + change verbs/nouns + policy terms**, rather than rely on generic social-sector keywords. For example, `Waakirchen AND (Haushalt OR Zuschuss OR Sozialraum OR Pflege)` is substantially cleaner than a standing search for `Soziales`.

Governance and coordination

`Sozialraum`, `Sozialraumlotse`, `Sozialraumlotsen`, `Lotsenfunktion`, `Anlaufstelle`, `Koordinationsstelle`, `Koordination`, `Vernetzung`, `Netzwerk`, `Netzwerkmanagement`, `Steuerungsgruppe`, `Lenkungsgruppe`, `Arbeitsgruppe`, `Arbeitskreis`, `Runder Tisch`, `Sozialbeirat`, `Sozialplanung`, `Quartiersmanagement`, `Quartierskonzept`, `GesundheitsregionPlus`, `Versorgungskonferenz`, `Pflegekonferenz`, `Psychosoziale Arbeitsgemeinschaft`, `PSAG`, `interkommunal`, `gemeindeübergreifend`, `ressortübergreifend`, `trägerübergreifend`, `Kooperationsvereinbarung`, `Zweckvereinbarung`, `Geschäftsordnung`, `Trägerschaft`, `institutionelle Verankerung`, `Verstetigung`, `Regelfinanzierung`.

Useful change terms: `gründet`, `eingerichtet`, `neu aufgestellt`, `zusammengelegt`, `aufgelöst`, `beendet`, `überführt`, `verstetigt`, `verlängert`, `neu besetzt`, `federführend`, `beauftragt`.

Money and fiscal pressure

`Haushalt`, `Haushaltsplan`, `Nachtragshaushalt`, `Haushaltssperre`, `Konsolidierung`, `Kürzung`, `Einsparung`, `Deckungslücke`, `Defizit`, `freiwillige Leistung`, `Zuschuss`, `Zuwendung`, `Förderung`, `Förderbescheid`, `Förderaufruf`, `Förderrichtlinie`, `Förderperiode`, `Kofinanzierung`, `Eigenanteil`, `Anschlussförderung`, `Förderende`, `Auslaufen`, `Kreisumlage`, `Bezirksumlage`, `Hebesatz`, `Schlüsselzuweisung`, `Finanzausgleich`, `Bedarfszuweisung`, `Stabilisierungshilfe`, `Stellenplan`, `Personalkosten`.

Funding entities/programmes: `SeLA`, `Selbstbestimmt Leben im Alter`, `PflegesoNah`, `Pflege im sozialen Nahraum`, `LEADER`, `ESF Plus`, `Aktion Mensch`, `Deutsche Fernsehlotterie`, `Stiftung Deutsches Hilfswerk`.

Workforce and organisational capacity

`Fachkräftemangel`, `Personalengpass`, `Stellenanzeige`, `Stellenausschreibung`, `vakant`, `unbesetzt`, `Nachbesetzung`, `Fluktuation`, `Kündigung`, `Geschäftsführung`, `Einrichtungsleitung`, `Bereichsleitung`, `Sozialpädagoge`, `Sozialpädagogin`, `Sozialarbeit`, `Pflegefachkraft`, `Erzieher`, `Schulbegleitung`, `Ehrenamtskoordination`, `Quartiersmanager`, `Netzwerkmanager`, `Projektleitung`, `Krankheitsausfall`, `Öffnungszeit`, `Leistungsreduzierung`, `Aufnahmestopp`.

Office entities to track explicitly: `Landrat`, `Erster Bürgermeister`, `Bürgermeisterin`, `Fachstelle für Soziales und Senioren`, `Sozialplanung`, `Jugendamtsleitung`, `Jobcenterleitung`, `Dekan`, `Caritasdirektor`, `Geschäftsführer`, `Vorstand`, `Pflegestützpunkt`.

Demand, care and participation

`Warteliste`, `Wartezeit`, `Aufnahmestopp`, `Versorgungslücke`, `Versorgungsengpass`, `Unterversorgung`, `Pflegebedarf`, `Pflegeplatz`, `Kurzzeitpflege`, `Tagespflege`, `ambulante Pflege`, `häusliche Pflege`, `pflegende Angehörige`, `Einsamkeit`, `Altersarmut`, `Demenz`, `psychische Gesundheit`, `Sucht`, `Obdachlosigkeit`, `Wohnungsnot`, `Schuldnerberatung`, `Erziehungsberatung`, `Hilfen zur Erziehung`, `Jugendhilfe`, `Eingliederungshilfe`, `Hilfe zur Pflege`, `Grundsicherung`, `Teilhabe`, `Inklusion`, `Migration`, `Integration`, `Selbsthilfe`, `Nachbarschaftshilfe`.

Mobility and access

`ÖPNV`, `Buslinie`, `Fahrplan`, `Takt`, `Taktverdichtung`, `Fahrtausfall`, `Rufbus`, `On-Demand`, `FLEX`, `BergBus`, `BRB`, `Regionalbahn`, `Barrierefreiheit`, `Mobilitätshilfe`, `Fahrdienst`, `Bürgerbus`, `Mitfahrbank`, `Erreichbarkeit`, `letzte Meile`, `Haltestelle`, `Wochenendverkehr`.

Rules and legislation

`SGB II`, `SGB VIII`, `SGB IX`, `SGB XI`, `SGB XII`, `Gesetzentwurf`, `Referentenentwurf`, `Kabinettsbeschluss`, `Bundestag`, `Bundesrat`, `Landtag`, `Ausschuss`, `Anhörung`, `Änderungsantrag`, `Verordnung`, `Richtlinie`, `Vollzugshinweis`, `Inkrafttreten`, `Rechtsanspruch`, `Konnexität`, `Leistungserbringung`, `Leistungsvereinbarung`, `Vergütungsvereinbarung`.

For SGB II searches, include both `Bürgergeld` and `Grundsicherungsgeld`: the latter has been the official benefit name since 1 July 2026, but older documents and local debate will continue to use the former. [63]

Church, civil society and sentiment

Church terms: `Dekanat Miesbach`, `Pfarrverband`, `Pfarrei`, `Seelsorge`, `Seelsorgsraum`, `Pastoral`, `Dekanatsreform`, `Kirchensteuer`, `Kirchenimmobilie`, `Immobilienverkauf`, `Pfarrheim`, `Zusammenlegung`, `Stellenplan`, `Caritas`, `Gemeindecaritas`.

Sentiment terms: `Bürgerinitiative`, `Petition`, `Protest`, `Widerstand`, `Kritik`, `umstritten`, `Streit`, `kontrovers`, `Mehrheit`, `Gegenstimme`, `abgelehnt`, `vertagt`, `zurückgestellt`, `Bürgerversammlung`, `Leserbrief`.

Geographic entities should always include all 17 municipalities plus `Landkreis Miesbach`, `Tegernseer Tal`, `Leitzachtal`, `Oberland`, `Region 17`, `Bezirk Oberbayern`, `Regionalentwicklung Oberland`, `Dekanat Miesbach` and `Dekanat Bad Tölz`.

Core source set and operating calendar

Recommended v1 core

A sensible v1 is **38 sources**. The point is not to monitor every potentially relevant website weekly. It is to catch high-consequence changes early, while relegating annual reports, specialist research and small-organisational calendars to slower cycles.

Core source	Layer	Why it earns a v1 slot
Bad Wiessee municipal source	1	One of the 17 political/fiscal decision nodes; replace election page with durable council source once located. [16]
Bayrischzell Gemeinderat	1	Current council/leadership baseline. [17]
Fischbachau official municipal record	1	Needed for full territorial coverage; current election document is a placeholder pending durable RIS/listing. [18]
Gmund Kommunalwahlen/ current Rathaus politics	1	Off-cycle mayor means council and administrative changes may otherwise be overlooked. [19]
Hausham Wahlen/Rathaus politics	1	Particularly relevant because the previous mayor became Landrat; local leadership transition matters. [64]
Holzkirchen Marktgemeinderat	1	Large municipality and important service/transport node; strong governance source. [21]
Irschenberg council minutes	1	Actual decision text rather than merely composition. [22]
Kreuth Gemeinderat	1	Full territorial coverage; off-cycle mayoral context. [23]
Miesbach Stadtrat/Rathaus politics	1	County seat and post-election leadership change. [65]
Otterfing finance source	1	Direct fiscal-room signal. [25]
Schliersee finance source	1	Direct fiscal-room signal; also important after 2026 political turnover. [26]
Tegernsee Stadtrat	1	Current council and mayor baseline. [27]
Valley municipal record	1	Full territorial coverage; replace static election document with recurring meeting page once verified. [28]
Waakirchen council sessions	1	Exemplary high-value municipal endpoint: future dates plus decision trail. [29]
Warngau Gemeinderat	1	Current political baseline; Warngau also appears in LEADER and civil-society signals. [66]

Core source	Layer	Why it earns a v1 slot
Fachstelle für Soziales und Senioren	2	The single strongest public structural map of the county's social network. [32]
Pflegestützpunkt	2	Front door to care-system navigation and a natural source of coordination/demand intelligence. [33]
GesundheitsregionPlus	2	Watch institutional formation while it is still “im Aufbau.” [34]
Jobcenter	2	Direct local exposure to the July 2026 SGB II reform. [67]
Jugendhilfeausschuss	2	Statutory, decision-relevant and already carrying population/Kita-demand material. [36]
Landkreis Amtsblatt	2	Formal changes that press feeds can miss. [37]
Regionalentwicklung Oberland / LEADER	2	Funding awards reveal emerging civil-society and municipal capacity. [39]
Diakonie Rosenheim	3	Active cross-sector provider with seven Miesbach offers and current news. [68]
BRK Kreisverband Miesbach	3	Active provider/volunteer-system signal. [43]
Lebenshilfe Miesbach jobs	3	One of the cleanest local skilled-worker indicators. [69]
Dekanat Miesbach	4	Parish restructuring and local church-network changes. [13]
Evang.-Luth. Dekanat Bad Tölz	4	Correct Protestant regional structure for the Miesbach area. [70]
Bezirk Oberbayern Sitzungstermine	5	Early view of decisions affecting Eingliederungshilfe, Pflege and financing. [71]
Bezirkshaushalt	5	Bezirksumlage/social-cost pressure. [72]
Bezirk Sozialberichterstattung	5	Regional indicator layer and emerging dashboards. [49]
StMAS SeLA	6	Highly relevant funding route for Quartier, Nachbarschaftshilfe and sustainability models. [12]
StMGP funding/PflegesoNah	6	Care-infrastructure grants and rule changes. [73]
Bayerischer Landtag sessions	6	State legislation and budget/committee milestones. [50]
StMFH kommunaler Finanzausgleich	6	Upstream determinant of local room for manoeuvre. [74]
BMAS SGB II / legislation tracker	7	Federal rule change with direct Jobcenter implications; future dates exposed. [75]

Core source	Layer	Why it earns a v1 slot
BMBFSFJ press releases	7	Children, youth, seniors, volunteering and Kita funding/ regulation in one current feed-like listing. [76]
Merkur local reporting	8	Needed for conflict, informal politics and civil-society events absent from official records; triangulate rather than treat as authoritative. [77]
Gemeindeschwester plus	9	Best verified peer for observing a model becoming a durable programme. [54]

Rottach-Egern and Weyarn should be added to the core the moment satisfactory recurring council/ news endpoints are pinned down. Their absence above is a source-discovery gap, not a judgment that they matter less.

For weekly feasibility, the scanner should poll the council/news/provider pages weekly, but only **diff** low-frequency structural pages. Budget/statistics/report pages can be checked monthly during most of the year and weekly during known budget or funding windows. This prevents annual reports from generating empty weekly noise.

The strongest verified sources deliberately left outside the weekly core are **Krankenhaus Agatharied Presse**—important but narrower and event-driven—**Caritas München-Freising Geschäftsberichte**, best on an annual/quarterly watch; **AWO Seniorenzentrum Miesbach**, **Hospizkreis**, and **Nachbarschaftshilfe Warngau**, valuable local texture but too narrow to justify weekly priority; the **Bezirk publications catalogue**, where policy documents appear irregularly; and the official population-statistics series, which should be ingested when a new release appears rather than scraped weekly. [78]

Scheduled-event calendar through October 2027

The public record is much better for **rolling calendars** than for a complete one-year forward schedule. I therefore distinguish actual scheduled dates from watch windows. I have not invented 2027 Kreistag/ Bezirkstag dates that were not visible in the material retrieved.

Date / window	Event	Status	Why the scanner cares
13 Oct 2026	Waakirchen Gemeinderat	scheduled, verified	first post-cutoff local agenda in the verified municipal calendar. [29]
25 Oct 2026	end of 2026 MVV BergBus season	scheduled, verified	useful point for ridership/continuation decisions and seasonal-access evidence. [41]
31 Oct 2026	PflegesoNah 2026 application deadline	scheduled, verified	last point for current-round care-infrastructure applications. [11]
10 Nov 2026	Waakirchen Gemeinderat	scheduled, verified	local governance/budget signal. [29]

Date / window	Event	Status	Why the scanner cares
8 Dec 2026	Waakirchen Gemeinderat	scheduled, verified	likely year-end decision point. [29]
Nov 2026–Mar 2027	Landkreis and municipal 2027 budget cycle	**watch window, exact dates not all published/verified**	track Kreisumlage, voluntary-service grants, staffing and project continuation.
Nov–Dec 2026	Bezirk Oberbayern 2027 budget / Bezirksumlage process	**watch window**	2026 budget was adopted in December 2025; use the live Sitzungstermine page rather than assuming the exact 2027 date. [79]
rolling	SeLA applications after mandatory prior consultation	verified ongoing route	direct relevance to Quartier/ Nachbarschaftshilfe and post-project financing. [12]
through 2027	Bayerischer Landtag plenary/committee calendar	rolling official calendar; 2027 plan linked	monitor SGB implementation, social policy and funding-rule changes. [50]
1 Aug 2027	further provisions of 13th SGB II amendment enter into force	scheduled, verified	second-stage implementation effects for Jobcenter and related local support services. [75]

The 2026 Bavarian double budget for 2026/27 was already passed on 23 April 2026, so the next twelve months are primarily an **implementation** period rather than a fresh Land-level annual budget vote. [80] That means county and municipal reactions to funding rules may be more informative than the Bavarian headline budget itself.

Gaps and uncertainty

The largest blind spot is not statistical. It is **relational**. Public sources can show that a Sozialbeirat or Netzwerk Quartiersmanagement exists, but generally do not show who actually comes, who brokers disagreements, who shares information by phone before a meeting, whether one organisation routinely blocks decisions, or whether a network survives when one key individual leaves. The county's public network map is therefore evidence of institutional *form*, not evidence of network *function*. [32]

Caritas and interviews need to supply the following information.

Public-source gap	What needs to be obtained directly
Actual Sozialraumlotsen governance	Current steering group, named institutional members, decision rights, escalation path, meeting cadence, project budget, funder, grant end date, reporting obligations and legal/contractual basis.

Public-source gap	What needs to be obtained directly
Municipal commitment	Which of the 17 municipalities actively participate; which send political versus administrative representatives; whether commitments are verbal, budgetary or contractual; and where resistance exists.
Network attendance and quality	Attendance lists for Sozialbeirat, Netzwerk Quartiersmanagement, Ehrenamt, Integration and related forums; cancelled meetings; recurring absences; duplicate memberships; evidence of joint decisions rather than information exchange.
Referral flows	Who sends people to whom, whether referrals are closed-loop, where hand-offs fail, how often people are sent to services with no capacity, and whether the proposed Lotsen role would duplicate existing navigation.
Unmet demand and waiting time	Service-level waiting lists, rejected referrals, Aufnahmestopps and unmet transport needs. Provider websites mostly advertise what is offered, not who could not be served.
Workforce persistence	Vacancy age, unsuccessful recruitment rounds, sick leave, turnover, use of temporary staff and whether capacity is being reduced because posts cannot be filled. Public job boards reveal vacancies but not the full denominator.
Service-contract economics	Actual Leistungs-/Vergütungsvereinbarungen, deficits on commissioned services, cross-subsidy, cost-sharing among Landkreis/Bezirk/ municipalities and what providers would cease doing without voluntary contributions.
Data architecture	Which datasets exist; who owns them; aggregation level; legal bases; interoperability; update cycle; protected fields; whether Caritas can receive anonymised/aggregated extracts; and which “platforms” are technically present but operationally unused.
Existing-platform use	User numbers, update frequency, search logs and reasons professionals/ residents bypass directories. The client's “existing platforms go unused” hypothesis cannot be verified from a public landing page.
Political robustness	Private positions of new mayors/councillors and senior administrators; what each would be willing to fund after the three-year project; whether there is cross-party support strong enough to survive the next election cycle.
Church assets and decisions below diocesan headline level	Planned use/sale of parish property, room availability, volunteer capacity, personnel reductions and whether Pfarrverbände would host local coordination functions.
Caritas's desired end-state	Whether Caritas wants permanent Trägerschaft, a neutral moderation mandate, a commissioning role, a hosted inter-municipal office, or eventually to hand the function to Landkreis/municipalities. These imply very different monitoring criteria.

Public-source gap	What needs to be obtained directly
Outcome definition	What would demonstrate that coordination has improved: referral completion, network density, reduced search time, fewer duplicated offers, improved access, increased early intervention, municipal satisfaction, or something else.
Funding-cliff tolerance	Minimum permanent staffing and annual cost that the system would require after project funding, and the maximum contribution each institutional actor could realistically carry.

There are also **research-source gaps** in this first register. Layer 8 is the weakest: I did not finish current endpoint verification for the requested Thünen-Institut, BBSR, DZA, IAB, DJI, Berlin-Institut, Bertelsmann Wegweiser Kommune and trade-press set (`neue caritas`, `NDV`, `Wohlfahrt intern`, `Sozialwirtschaft`), nor for BR24 Oberbayern, Das Gelbe Blatt and Tegernseer Stimme as recurring listing pages. These are strong candidates, but because the brief explicitly says to open every listed URL and not invent feeds, I have left them **plausible, unverified** rather than presenting remembered URLs as checked sources.

The same applies to several Layer-6/7 umbrella organisations requested in the brief—**Bayerischer Landkreistag, Bayerischer Gemeindetag, Freie Wohlfahrtspflege Bayern, Landes-Caritasverband, Deutscher Verein, BAGFW, Deutscher Caritasverband and Deutscher Landkreistag**—and to the current federal health-ministry endpoint. They are substantively obvious scanner candidates, but their exact current listing/feed endpoints were not all independently reopened here and therefore are not falsely marked verified.

The peer-case layer is intentionally narrow. **Gemeindeschwester plus is the strongest verified continuation case** because the programme itself publicly documents the transition from model to Verstetigung to Landesprogramm. [54] Austrian Community Nursing and Präventionsketten add useful comparative material, but I am less certain about direct institutional transferability to rural Upper Bavaria. I am still less certain about the requested English link-worker and Dutch neighbourhood-team comparisons because I did not obtain sufficiently current primary-source evidence on post-project financing and institutional survival in this pass.

Finally, the project-specific public record remains the largest factual uncertainty. I found enough evidence to map **the landscape around** “Interkommunale Sozialraumlotsen,” but not enough public material to verify **the project's own network, contracts, financing, steering arrangements or intended Verstetigungsmodell**. That is precisely where the horizon scanner should not substitute inference for interviews. The public record can tell Caritas when the environment is changing; Caritas and its partners will have to provide the private institutional facts needed to judge whether the coordination model is actually becoming durable.
